Superior Accuracy

• Excellent HPLC precision
• NGSP Certified and traceable to Diabetes Control and Complications Trial (DCCT)
• Anchored to the IFCC reference method
• Accurate and reportable HbA1c results in the presence of hemoglobin S or C traits
• Accurate HbA1c results in the presence of carbamylated (CHb) and Labile A1c (LA1c)

Efficiency and Accuracy

VARIANT™ II TURBO
Rapid, fully automated HPLC precision, and powerful software deliver quality results in half the time.

Bring efficiency and accuracy together for quality patient care

You never forget the people who count on your results—even on your busiest days. We kept that commitment in mind when we developed the VARIANT™ II TURBO. With the ability to process thousands of tests per month, this cutting-edge system lets you be the difference for the people who count on you—in a fraction of the time.

**Faster**
- 97 seconds per sample
- Deliver accurate results in half the time

**Efficient**
- Fully-automated operation saves time and labor
- Eliminate time-consuming sample prep with primary tube sampling
- Fastest in workflow through either continuous or batch sampling
- STAT capability
- Capillary Collection Kit allows remote fingerstick sample collection to support outreach programs*
- STAT capability
- Capillary Collection Kit allows remote fingerstick sample collection to support outreach programs*
- Simplified data management with powerful software
- 60% less buffer material and container
- Easily readable reagent levels in transparent buffer bottles
- Easy-to-use tools for QC, instrument support and education

**Accurate**
- Excellent HPLC precision
- NGSP certified
- Anchored to the IFCC Reference Method
- HbA1c reportable in the presence of S and C traits

*Not available in the U.S.

Every patient deserves quality results. You deserve efficiency and accuracy.

**Powerful Data Management**
- Results and chromatograms captured and archived by Bio-Rad’s Clinical Data Management™ (CDM) software
- CDM™ interfaces with your laboratory information system for optimal data management
- Advanced diagnostics, user alerts and prompts reduce costs and training time
